Materials Range

MAC Distinction is manufactured from a vast selection of materials and finishes to achieve a stunning outcome for your project.

COLORBOND® Steel

Colorbond® steel is a 100% Australian product that has been tested and developed to withstand the harsh and extreme Australian environment. MAC Distinction® is available in the complete Colorbond® range which includes Contemporary; Classic; Ultra and Matt.

SUPERDURA® Stainless Steel

Stainless Steel is one of the most common materials used in today's construction. Distinction® may be used both on the interior and exterior of buildings creating a striking architectural effect.

Copper

Copper has an attractive and unique finish. It is very durable and low maintenance with natural resistance to salt water corrosion making it ideal for coastal locations. It is also 100% recyclable.

Aluminium

Aluminium is an economical and corrosion resistant product which is malleable, lightweight and strong. It is easily shaped to suit a range of different profiles. Aluminium is non-combustible and comes with excellent material warranty.

* Aluminium Material Warranty from 15 to 40 years depending on specification

Redcor® Weathering Steel

Redcor® Weathering Steel is a steel alloy developed to eliminate the need for painting and forms a stable rust-like appearance.

OIL CANNING

What is Oil Canning?

Oil Canning is an inherent characteristic of non-ferrous metals with broad, flat areas. The Architect, Builder and Homeowner needs to be aware that Oil Canning may affect the overall aesthetic outcome.

There are measures that can be taken during design and installation to minimise the risk, such as ensuring the plywood is flush, the panels are fixed vertically, limiting the continuous length of each panel and reducing the size of the pan.
