

CAVITY SLIDING DOOR FRAMES

**NEW
PRODUCT**

Cavity Sliding Door Frames from Metroll are the ultimate space saving door frame. The frame allows for the door to slide into the wall frame creating clear space around the opening. Metroll Cavity Sliding Door Frames are the perfect combination of style and engineering.

Stronger and sturdier than timber framed doors, Metroll Cavity Sliding Door Frames incorporate quality engineering with heavier gauge steel and superior reinforcing, this makes them more robust than other cavity door options.
