

NEW PRODUCT

Introducing GRAPTOR

The easiest way to comply with Australian Standards and mandatory gutter overflow requirements of the Building Code - with no slots required.

- Fully compliant solution using a **plain faced gutter profile**:
 - Increased rainwater collection
 - Aesthetically pleasing
- Reduce downpipe requirements and save costs.
- Concealed fix bracketing promotes clean, straight lines.
- Independently tested and fully certified.
- The Graptor bracketing system is suitable for:
 - Quad 115 High Front Gutter
 - Quad 125 High Front Gutter
 - Quad 150 High Front Gutter - QLD only
 - Skyline Gutter
- Suitable for metal and timber fascia.
- Clip-on to new builds - metal fascia.
- Screw fix for retrofit - metal and timber fascia.
- Quick, simple and cost effective.
- Compatible with slotted gutter options.

The NCC 2019, Part 3.5.2 details that overflow measures are required to prevent water entering or damaging a building **even if the gutter and downpipe system is completely blocked.**

**10mm gap for
water overflow**

EVERYTHING ELSE IS DEAD IN THE WATER
